# PRESS RELEASE

FOR IMMEDIATE RELEASE

## *Food Manufacturer Purchases PhyleTec Hosted Enterprise Software System*

**Holly, MI - October 23, 2007:** PhyleTec L.L.C. announces extended capabilities designed specifically for companies that produce food or chemical products in a batch mode. These capabilities include the ability to create formulas or recipes that utilize multiple units of measure and a packaging phase that allows newly produced product to be stored in bulk and subsequently packaged for sale.

Carolina Ingredients, a Pineville, N.C. food manufacturer was using a Microsoft solution that consisted of several add-on systems. They finally decided to switch to the PhyleTec hosted solution because of its integrated set of features and customizability. "Our current processes require way too many spreadsheets and redundant data entry," said Doug Meyer-Cuno, President and Owner of Carolina Ingredients. "PhyleTec will give us the integrated supply chain tools we need."

PhyleTec is a Hosted Extended Supply Chain Management and Execution solution. It is based on leading edge technology and design methodologies. Carolina Ingredients is a premier distributor and blend manufacturer of food ingredients. For 17 years, they have been driven to provide the best customer service in their industry and to employ innovation to create superior value for their customers.

Background: PhyleTec L.L.C. is born out of the Phyle family of companies. The Phyles have been helping companies maintain accurate inventories for over 30 years. PhyleTec.com is a system that provides internal operational and supply chain functionality required by distributors and light manufacturers. Universal Data, Inc. (another Phyle family company) manufactures and sells wireless and batch-mode handheld data collection devices with integrated bar-code scanners.

To learn more about PhyleTec L.L.C. and Universal Data Inc., call Dana Demski; Account Executive at (248) 634-4000 ext. 260 or email [ddemski@phyletec.com](mailto:ddemski@phyletec.com).
